SUMEET KANHIYA

Full Stack Developer (PERN / MERN) | Software Engineer

Karachi, Pakistan | +92 323 3173188 | sumeetkanhiya11@gmail.com | linkedin.com/in/sumeet-kanhiya | github.com/sumeetkl11

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer specializing in the PERN and MERN stacks (PostgreSQL, MongoDB, MySQL, Express.js, React.js, Node.js). Experienced in designing scalable RESTful APIs, low-latency real-time distributed systems (Socket.io, Redis), and integrating Google Gemini AI workflows within Agile / Scrum methodologies. Proven track record delivering production-grade SaaS, e-commerce, and collaboration applications with optimized performance and clean architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Backend & Real-Time: Node.js, Express.js, RESTful APIs, Socket.io, WebSockets, WebRTC, JWT, OAuth 2.0, Nodemailer
Frontend & State: React.js, Next.js, Redux Toolkit, Context API, Vite, Tailwind CSS v4, Framer Motion, Lucide Icons
Databases & Caching: PostgreSQL (Neon), MongoDB Atlas, MySQL, Redis (Pub/Sub & Adapters), Prisma ORM
Tools, DevOps & AI: Docker, Git, GitHub, CI/CD, Postman, Thunder Client, Vercel, Render, Gemini API (Prompt Engineering), Agile/Scrum

PROFESSIONAL EXPERIENCE

Backend Developer — ChefCraft | **Mar 2025 – Jun 2025**
Production Project | Node.js, Express.js, PostgreSQL, MongoDB, Gemini API, Git, Agile

- Engineered 25+ RESTful API endpoints using Node.js & Express.js for an AI meal-planning platform, cutting manual meal-plan configuration time by 80% and reducing data retrieval latency by 25% through optimized indexing.
- Integrated Google Gemini API with structured prompt design and multi-tier model fallbacks (gemini-2.5-flash / gemini-2.0-flash), achieving deterministic JSON output schemas with sub-2s generation latency.
- Optimized PostgreSQL & MongoDB database queries and generation algorithms, decreasing API response times by over 200ms while managing Git-based continuous deployments.

Freelance Web Developer | **Dec 2024 – Present**
Independent Clients | PERN / MERN Stack, React.js, Redux, Context API, Next.js, Tailwind CSS, TypeScript

- Delivered 2+ end-to-end full-stack web applications for clients across SaaS, e-commerce, and content platforms using Agile/Scrum sprint cycles.
- Architected performance-optimized, responsive frontends with React and Tailwind CSS, improving page load speeds by 30% and boosting Core Web Vitals across client platforms.

FEATURED PROJECTS

Linkforge — Real-Time Team Collaboration Workspace (linkforge-mauve.vercel.app)
React 19, TypeScript, Vite, Node.js, Express.js, PostgreSQL (Neon), Socket.io, Redis, Context API, Tailwind CSS

- Built a 4-module team collaboration platform (chat, Kanban, wiki, directory) supporting 500+ concurrent users via Socket.io & Redis pub/sub, consolidating Slack/Notion/Jira-equivalent workflows into one tool.
- Implemented PostgreSQL (Neon) data schemas with Redis caching, Google/GitHub OAuth 2.0, JWT session verification, and Nodemailer SMTP automated invite delivery.
- Integrated Gemini API for AI-assisted sprint planning, intelligent task drafting, and automated acceptance criteria generation.

Sock.io — Real-Time Messaging & Voice Call Platform (sock-io.onrender.com)
Socket.io, Node.js, Express.js, MongoDB Atlas, Redis, WebRTC, React, TypeScript, PWA

- Engineered a low-latency real-time communication platform utilizing Socket.io for instant messaging and WebRTC for peer-to-peer audio calls with STUN NAT traversal.
- Architected encrypted-at-rest persistence with MongoDB Atlas and integrated Redis (@socket.io/redis-adapter) for socket connection mapping and scale-out pub/sub.
- Developed offline-first PWA capabilities with an IndexedDB queue for seamless message synchronization upon reconnect.

ChefCraft — Intelligent AI Recipe & Meal Planning Platform (chef-craft.vercel.app)
React.js, Node.js, Express.js, PostgreSQL, MongoDB, Gemini API, Tailwind CSS

- Developed a full-stack meal-planning platform with dietary/caloric filtering, generating personalized recipes in under 2 seconds via Gemini API integration.
- Automated weekly grocery list compilation from generated meal plans, streamlining pantry inventory tracking and ingredient management.

CORE COMPETENCIES

Real-Time & Distributed Systems: Event-driven architecture with Socket.io, WebRTC peer-to-peer media, and Redis multi-node pub/sub scaling.
Database Design & Optimization: Normalized PostgreSQL / MySQL relational schemas with indexing; high-performance MongoDB aggregation pipelines.
AI Integration & Prompt Engineering: Structured prompt design for Google Gemini API with deterministic JSON schemas and fallback queues.
Full-Stack Security & DevOps: OAuth 2.0 / JWT session validation, role-based access control, Docker containerization, and Agile sprint workflows.

EDUCATION

B.S. in Computer Science | **Nov 2024 – Dec 2028 (Expected)**
Dawood University of Engineering & Technology (DUET), Karachi
Relevant Projects: Linkforge (Team Workspace), Sock.io (Real-Time Messaging/Voice), ChefCraft (AI Meal Planning).
Core Coursework: Database Management Systems, Software Engineering, Computer Networks, Data Structures & Algorithms, OOP, Agile Methodologies.
